## EXPERIENCE

### ORIGINAL INSURANCE GROUP INC | Application Support Specialist Jun 2024 - Present | Downey, CA

- Applied task prioritization while resolving 200+ production support tickets via Jira across agency management SaaS, internal integrations, and Microsoft 365,, maintaining sub-90-minute average resolution.
- Investigated production incidents through critical thinking and problem-solving, log analysis, SQL queries, and API debugging with Postman, isolating root cause and validating fixes in live environments.
- Monitored nightly ETL jobs syncing data from 22 carrier/vendor feeds into a production database, triaging failures and building a Python reconciliation script that reduced monthly close prep from 5 hours to 40 minutes.
- Administered Microsoft 365 and Entra ID, including MFA, RBAC, and license management, and used Microsoft Graph API and PowerShell to streamline user provisioning across 20+ SaaS apps, reducing onboarding from 4 hours to 45 minutes.
- Supported webhook and carrier integration workflows for the agency management system, troubleshooting payload, authentication, and data-sync failures with Postman and structured logs.

### CALIFORNIA STATE UNIVERSITY, LONG BEACH | Building Manager, IT Operations Support Jan 2024 - Aug 2025 | Long Beach, CA

- Provided first-line application support for Astra Schedule, EMS, and campus access control systems, resolving room scheduling conflicts, user access issues, classroom AV incidents, and operational system disruptions during after-hours campus operations.
- Diagnosed access and scheduling issues by reproducing errors, validating permissions, resetting user access, checking configurations, and escalating complex incidents to campus IT.
- Maintained incident documentation, escalation notes, and recurring issue tracking, using verbal communication and cross-functional collaboration with campus IT and third-party vendors.

### WEHELP, CHRIST THE GOOD SHEPHERD FOOD BANK | Volunteer Application Support Specialist Apr 2021 - Present | Long Beach, CA

- Applied business analysis to identify the need for a centralized food-distribution tracking system, then independently built, tested, and deployed Loavenly for staff and volunteers across three distribution locations.
- Support Loavenly during live Wednesday and Saturday distributions by managing user access, troubleshooting production issues, validating updates, and training staff and volunteers.

## PROJECTS

### LOAVENLY | Multi-Tenant Food Bank Operations Platform | [loavenly.com](https://loavenly.com)

- Built, deployed, and operate a production multi-tenant SaaS platform supporting client intake, inventory tracking, reporting, and RBAC across three food bank locations.
- Configured RBAC and resolved API, authentication, synchronization, and permission issues during live production operations.
- Improved platform performance through database indexing, server-side aggregation, and pagination while maintaining sub-100ms response times.

## EDUCATION

*Bachelor of Science | Computer Science, California State University, Long Beach*

May 2025

## CERTIFICATIONS

AWS Certified Cloud Practitioner | CompTIA Network+ | Microsoft Azure Fundamentals | ITIL 4 Foundation
