Application Support Engineer with 3+ years across application support and IT operations, including production SaaS, Microsoft 365, and internal integrations. Resolved 200+ tickets with sub-90-minute average resolution and built Loavenly, a production multi-tenant SaaS platform, specializing in SQL, log analysis, API debugging, and root cause analysis.

SKILLS

Technical Support:	Production Support, Troubleshooting, Incident Response, Root Cause Analysis, SLA Management
APIs & Identity:	Microsoft 365, Entra ID, MFA, RBAC, SSO, Microsoft Graph API, REST APIs, Webhooks, OAuth 2.0, SAML, Postman
Languages & DBs:	Python, SQL, JSON, PowerShell, JavaScript, TypeScript, Bash, PostgreSQL, MySQL, SQLite, Supabase
Cloud & Systems:	AWS (EC2, S3, IAM), Vercel, Linux, Windows, CI/CD (GitHub Actions)
Tools:	Jira, Confluence, Excel, Sentry, Git, GitHub, VS Code

EXPERIENCE

ORIGINAL INSURANCE GROUP INC | Application Support Specialist Jun 2024 - Present | Downey, CA

- Applied task prioritization while resolving 200+ production support tickets via Jira across agency management SaaS, internal integrations, and Microsoft 365, maintaining sub-90-minute average resolution.
- Used problem-solving and log analysis, SQL queries, and API debugging with Postman to investigate production incidents, isolate root cause, and validate fixes in live environments.
- Monitored nightly ETL jobs syncing data from 22 carrier/vendor feeds into a production database, triaging failures and building a Python reconciliation script that reduced monthly close prep from 5 hours to 40 minutes.
- Administered Microsoft 365 and Entra ID, including MFA, RBAC, and license management, and used Microsoft Graph API and PowerShell to streamline user provisioning across 20+ SaaS apps, reducing onboarding from 4 hours to 45 minutes.
- Supported webhook and carrier integration workflows for the agency management system, debugging payload, authentication, and data-sync failures using Postman and structured logs.

CALIFORNIA STATE UNIVERSITY, LONG BEACH | Building Manager, IT Operations Support Jan 2024 - Aug 2025 | Long Beach, CA

- Provided first-line application support for Astra Schedule, EMS, and campus access control systems, resolving room scheduling conflicts, user access issues, classroom AV incidents, and operational system disruptions during after-hours campus operations.
- Diagnosed access and scheduling issues by reproducing errors, validating permissions, resetting user access, checking configurations, and escalating complex incidents to campus IT.
- Applied organizational skills to maintain incident documentation, escalation notes, and recurring issue tracking while coordinating with campus IT and third-party vendors.

WEHELP, CHRIST THE GOOD SHEPHERD FOOD BANK | Volunteer Application Support Specialist Apr 2021 - Present | Long Beach, CA

- Identified the need for a centralized food-distribution tracking system, then independently built, tested, and deployed Loavenly for staff and volunteers across three distribution locations.
- Provide customer service for Loavenly during live Wednesday and Saturday distributions by managing user access, troubleshooting production issues, validating updates, and training staff and volunteers.

PROJECTS

LOAVENLY | Multi-Tenant Food Bank Operations Platform | loavenly.com

- Built, deployed, and operate a production multi-tenant SaaS platform supporting client intake, inventory, report creation, and RBAC across three food bank locations.
- Configured RBAC and resolved API, authentication, synchronization, and permission issues during live production operations.
- Drove continuous improvement through database indexing, server-side aggregation, and pagination while maintaining sub-100ms response times.
